PROFESSIONAL SUMMARY

AI/ML Engineer (Fresher) with hands-on experience in Machine Learning, Deep Learning, Generative AI, LLMs (GPT/Hugging Face), RAG pipelines, and multi-agent AI systems. Skilled in LangChain, LangGraph, embeddings, vector search (FAISS, Pinecone), prompt engineering, and Model Context Protocol (MCP) for multi-turn conversational AI. Delivered multiple end-to-end freelance projects including AI chatbots, recommendation engines, and legal document Q&A systems. Experienced in ML model training, fine-tuning, evaluation, deployment, and cloud-based production-ready pipelines using Docker, FastAPI, Streamlit, and AWS/GCP/Azure. Strong in NLP, semantic search, text analytics, and automated AI pipelines, enabling practical, scalable AI solutions.

SKILLS & ABILITIES

Machine Learning & AI: Machine Learning, Deep Learning, Neural Networks, Model Training, Fine-Tuning, Supervised & Unsupervised Learning, Regression, Classification, Clustering

Generative AI & LLMs: GPT, Hugging Face Transformers, LangChain, LangGraph, RAG Pipelines, Multi-Agent Systems, MCP, Prompt Engineering

NLP & Text Analytics: Named Entity Recognition (NER), Sentiment Analysis, Text Classification, Tokenization, Text Preprocessing, Feature Extraction

Vector Databases: FAISS, Pinecone, Chroma, Weaviate

Deployment & MLOps: Docker, MLflow, DVC, FastAPI, Flask, Streamlit, REST APIs, Production-Ready Pipelines

Cloud Platforms: AWS, GCP, Azure (Compute, Storage, Serverless)

Data & Visualization: Python, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn

PROFESSIONAL EXPERIENCE

AI & ML Freelance Engineer

Self-Employed | Aug 2025 – Present

- Delivered 5+ AI/ML projects end-to-end, including multi-agent Legal RAG system, AI chatbots, YouTube Q&A system, TalentLens Resume Analyzer, and Movie Recommendation Engine.
- Designed and deployed LangGraph multi-agent AI pipelines, incorporating LLMs, embeddings, vector search, and semantic reasoning.
- Implemented RAG pipelines, MCP, and prompt engineering for high-accuracy multi-turn conversational AI.
- Built production-ready ML/AI pipelines using Docker, FastAPI, Streamlit, and cloud platforms (AWS/GCP/Azure).
- Managed full project lifecycle: planning, coding, model training, testing, deployment, and monitoring.

MY PROJECTS

Legal Document Q&A System (Multi-Agent Legal RAG)

- ✓ Built LangGraph multi-agent RAG system for legal document retrieval and reasoning
- ✓ Orchestrator → Retriever → Cross-Reference → Legal Analyst → Synthesizer pipeline
- ✓ Integrated query rewriting loop for low-confidence answers (<0.6)
- ✓ Achieved +20% retrieval accuracy and reliable citation-based answers
- ✓ Applied MCP to maintain multi-turn conversation context

Technologies: Python, LangChain, LangGraph, FAISS, Hugging Face, Streamlit, LLMs

AI Chatbot with Token-by-Token Streaming:

- ✓ Real-time token streaming chatbot with multi-turn session memory using MCP
- ✓ Built using LangGraph workflows to handle complex conversational flows

Technologies: Python, Streamlit, LangChain, LangGraph, Hugging Face

Q&A System on YouTube Video:

- ✓ Built context-aware Q&A system from YouTube transcripts using embeddings + vector search
- ✓ Improved answer relevance by 15–20% compared to baseline retrieval

Technologies: Python, LangChain, FAISS, Streamlit, Hugging Face

TalentLens By NLP:

- ✓ Automated resume parsing, skill scoring, and career recommendations
- ✓ Admin dashboard for analytics and report generation

Technologies: Python, Streamlit, spaCy, PyPDF2, MySQL

Movie Recommendation System:

- ✓ Content-based recommendation engine using CountVectorizer + KNN
- ✓ Built web interface for personalized movie suggestions

Technologies: Python, Pandas, NumPy, Scikit-learn, Flask.

CERTIFICATIONS

Generative AI with Large Language Models, deeplearning.ai, Dec 2025 | Credential ID: Sm898fc97m51

EDUCATION

2021-2025	Bachelor of technology	College	CGPA
	In Computer Sciences	RIT,Roorkee	7.2
