

MOHD ZAID

Generative AI Engineer | LLM Applications | RAG Systems | AI Agents

Bazpur, Uttarakhand, India 263150 | (+91) 7078119980 | [GitHub](#) | [Linkedin](#) | mohdzaidonly@gmail.com

PROFESSIONAL SUMMARY

Generative AI Engineer and Python Developer with hands-on experience building AI-powered applications, Retrieval-Augmented Generation (RAG) systems, AI agents, and production-ready backend services. Delivered a live client application and multiple AI solutions using FastAPI, LangChain, LangGraph, Hugging Face, and vector databases. Skilled in designing scalable APIs, semantic search systems, conversational AI workflows, and deploying end-to-end applications from development to production.

TECHNICAL SKILLS

Programming Languages:

Python, SQL

Generative AI & LLM Engineering:

Large Language Models (LLMs), Generative AI, Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, LangChain, LangGraph, Hugging Face Transformers, Semantic Search

AI/ML & NLP:

Natural Language Processing (NLP), Scikit-learn, Semantic Search, Recommendation Systems, Text Processing

Backend & API Development:

FastAPI, Flask, REST APIs, API Integration, SQLAlchemy, Backend Architecture, Authentication Systems

Databases & Vector Databases:

MySQL, MongoDB, FAISS, ChromaDB, Pinecone, Vector Search

Deployment & Developer Tools:

Docker, Linux, Git, GitHub, Streamlit, MLflow (Basic)

Frontend Technologies:

HTML, CSS, JavaScript, Jinja2

PROFESSIONAL EXPERIENCE

AI & ML Freelance Engineer

Self-Employed | Aug 2025 – Present

- Developed AI-powered applications, backend systems, and automation solutions, including a live healthcare platform for a client and multiple independent GenAI projects.
- Built FastAPI-based backend services with secure authentication, database integration, and REST API architecture.
- Developed Retrieval-Augmented Generation (RAG) pipelines using LangChain, LangGraph, Hugging Face, and vector databases.
- Managed complete project lifecycle including requirement gathering, architecture design, development, testing, deployment, and client handover.
- Worked across AI application development, chatbot systems, semantic search solutions, and workflow automation.

SELECTED CLIENT PROJECTS

PathLab Management System | Live Freelance Client Project-([Live link](#))

Tech Stack: FastAPI, Python, MySQL, SQLAlchemy, LangChain, Hugging Face, HTML, CSS, JavaScript, SMTP

- ✓ Delivered and deployed a pathology laboratory management platform for a healthcare client.
- ✓ Built a secure admin dashboard for managing laboratory test panels, pricing, offers, content updates, and customer enquiries.

- ✓ Implemented secure session-based authentication and email-based password recovery workflow.
- ✓ Designed relational database architecture using MySQL and SQLAlchemy ORM.
- ✓ Developed secure image upload functionality with file validation and protected storage.
- ✓ Integrated an AI-powered chatbot using LangChain and Hugging Face models to answer laboratory-related queries.
- ✓ Independently handled client requirements, development, deployment, testing, and final delivery.
- ✓ Configured production deployment with environment variables, database connectivity, static file handling, and third-party API integrations

SELECTED PROJECTS

Legal Document Q&A System (Multi-Agent Legal RAG)

Dec 2025 – Feb 2026

Tech Stack: LangChain, LangGraph, FAISS, FastAPI, Hugging Face, Python

- ✓ Developed a multi-agent Retrieval-Augmented Generation system for document question answering.
- ✓ Implemented semantic search and contextual retrieval using FAISS vector database.
- ✓ Built FastAPI endpoints for AI workflow integration.
- ✓ Improved answer relevance through prompt engineering and retrieval optimization.

AI Chatbot with Token-by-Token Streaming:

Oct 2025 – Nov 2025

Tech Stack: LangGraph, Hugging Face, Streamlit, Python

- ✓ Built a conversational AI application with real-time token streaming.
- ✓ Implemented multi-turn conversation memory to maintain contextual interactions.
- ✓ Designed modular LangGraph workflows for conversation management.
- ✓ Integrated Hugging Face models for response generation.

TalentLens By NLP:

Jun 2025 – Sep 2025

Tech Stack: NLP, Streamlit, MySQL, Python

- ✓ Developed an NLP-based platform for resume parsing and candidate analysis.
- ✓ Implemented skill extraction and recommendation logic for career guidance.
- ✓ Integrated MySQL database for user management and data storage.
- ✓ Created an interactive Streamlit interface for resume insights and recommendations.

CERTIFICATIONS

Generative AI with Large Language Models, deeplearning.ai, Dec 2025 | Credential ID: Sm898fc97m51

EDUCATION

2021-2025	Bachelor of technology	Uni	CGPA
	In Computer Sciences	UTU, Ddn	7.2
